How to run test plan:

1. Compile the SDNS library
2. Navigate to the folder containing jmeter.
3. Open the GUI
4. Open up load/SDNSTestPlan.jmx
5. Click Test Plan and change the Library to wherever the full extension is for Program\ 0.jar (the compiled library jar file)
6. Save and close test plan
7. Where you can run jmeter, run this:

jmeter -n -t [full extension of this file]\load\SDNSTestPlan.jmx -e -l [log output file] -o [report folder]  -Jhost=[server address] -Jport=[server port]

8. The results will be in your specified results folder, fully viewable by double clicking index.html.
